END OF SEARCH HISTORY

August 1998. <http://www.doi.org/white-paper-3.pdf>, at p. 10.

(10) - From a discussion on the DOI discussion group,
<http://www.doi.org/mailman/listinfo/discuss-doi>

(11) - Document ISO/TC 46/SC 9/WG 1 N 64, dated September 24, 1998.

(12) - "3.1 audiovisual work: Work consisting of a series of related images, with or without accompanying sound, which is intended to be made visible and/or audible through the use of devices, regardless of the medium of initial or subsequent fixation."

(13) - Stuart Weibel, Erik Jul and Keith Shafer. PURLs: Persistent Uniform Resource Locators. 12/9/1998. Available at <http://purl.oclc.org/oclc/purl/summary>

(14) - Participants came from the following countries: Australia, Canada, Denmark, Finland, France, Germany, Japan, Norway, Sweden, Thailand, United Kingdom and the United States.

(15) - HTML or Hypertext Markup Language is a form of SGML, the Standard Generalized Markup Language, which is ISO standard 8879. SGML could be viewed as a system that allows one to define and use documents, in particular on the World Wide Web. XML is the Extensible Markup Language. XML is a more "transaction-friendly" SGML-based system. It is thus probably better suited to enable e-commerce.

(16) - The National Library of the Netherlands is quite active in this field. It is also building a repertory of all online resources available in the Netherlands. See <http://www.kb.nl/coop/donor/>

(17) - For the purposes of this section, "privacy" relates to protection of consumer data, while "confidentiality" applies in a corporate environment.

(18) - Anne W. Branscomb. Anonymity, Autonomy and Accountability: Challenges to the First Amendment in Cyberspaces. (1995) 104 Yale Law Journal, 1639. Professor Julie Cohen (University of Pittsburgh) has taken a similar view.

(19) - Online full assignments (transfers) of rights may take place, but they would seem to be the exception.

(20) - It must be said that some "newer" rights holders who started to play that role due to the possibilities of digital technology have (impatiently) held that view since the very beginning.
